Backdrop Ideas and Inspirations

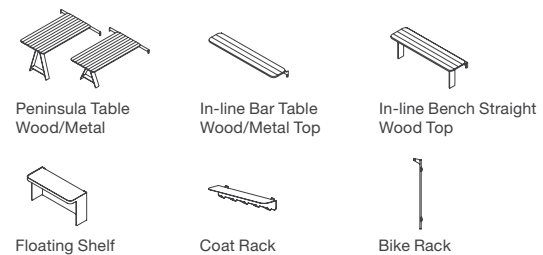

Backdrop is an innovative system of modular panels, posts, and accessories that presents a new solution for defining and activating a wide range of outdoor destinations. Elegantly framing spaces, providing privacy, guiding the flow of passersby, and welcoming people to stop and interact, Backdrop flows with an environment's existing features and inspires the lives of the people who engage with it. Placed along people's daily paths—such as throughout streetscapes, corporate, university and healthcare campuses, residential communities, and hospitality and retail venues—Backdrop creates sought-out places for focus and productivity, a bite to eat, an impromptu conversation, or a personal moment to recharge.

This Planning Guide offers ideas and inspiration on how Backdrop can be applied in these diverse contexts, illustrating how its structural modularity, dynamic functionality, and varied accessories can bring new value to existing and underutilized outdoor spaces. As Backdrop is designed and engineered to spark designers' creativity and empower them to craft unique, site-specific installations, the following examples represent only a small fraction of the potential solutions this adaptable system offers.
