Candela

High-Quality Lighting for High-Value Streetscapes

Candela area lights, designed by Gonzalo Milà, bring high design to LED lighting for urban landscapes. Minimal in form, the oval-shaped luminaire is slim and sleek ideal for streetscape settings. Maximum in function, Candela offers three energy-efficient LED arrays, multiple distributions and drive current options, as well as supporting 3000K and 4000K color temperatures. Pole heights range from 26 feet to 32 feet and with arms in three lengths. Single, dual, and staggered configurations along the pole achieve light levels tailored to the site.

Candela's cast aluminum housing dissipates heat while its meticulous details and finish express the high quality that is a trademark of design partner Urbidemis.
