# Concord Collection

landscapeforms

**Product Data Sheet**

Concord is an integrated collection of site furniture elements in a "Modern Traditional" idiom. Created in collaboration with Robert A. M. Stern Designs, Concord is informed by the past and contemporary in spirit. The collection embraces progress and new technologies, while rooted in American history and our national view of the landscape as a place of respite and pleasure. Concord's five elements include a bench, a litter and recycling receptacle, a pedestrian light, a pathway light, and a bike rack — all related in form, scale and materials, and individual in expression and detail. The collection adds a new and distinctive design perspective to Landscape Forms' integrated site furniture solutions for creating a Sense of Place.
