

SILLA

Product Data Sheet

Silla is visually striking stand - ing alone, in informal clusters, or in more formal arrangements. Silla's unusual Z-shaped form is cast in a single piece with a section that narrows from base to seat to backrest. The angle of the seat and back make it surprisingly comfortable.

Chair

- Silla is a Reinforced Cast Stone chair with a seat height of 18".
- Cast as a single piece, the section of its Z-shaped form is thickest at the base, thinner at the seat and narrowed further on the backrest.
- Silla must be embedded.
- Silla has a polished and waterproofed finish, and is available in Grey, Black, White and Beige.

Material

- Reinforced Cast Stone is cast stone that is poured and cast over an iron re-bar cage built to fit within the walls of the mold.
- Reinforced Cast Stone makes it possible to cast thinner, irregularly shaped forms while retaining appropriate strength.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is pre-determined by the formulation used in its manufacture.
- Cast stone products do not require any specific maintenance during their estimated lifespan of more than 30 years.
- Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.
