## Product Data Sheet

These robust elements with flowing forms cast in a single piece individualize outdoor seating in public spaces. The large Sillarga lounge chair lets the user lean back with feet up. The small Sicurta chair shares the same ergonomic back shape in an upright format.

### Seating

- Sillarga is a Reinforced Cast Stone recliner produced as a single piece: Sicurta takes the same design, and creates a reinforced stone seat.
- These backed chairs are available in Grey, Black, White, and Beige, with an acid-etched/waterproofed finish.
- Both chairs can be freestanding or embedded.

### Material

- Reinforced Cast Stone is cast stone that is poured and cast over an iron re-bar cage built to fit within the walls of the mold.
- Reinforced Cast Stone makes it possible to cast thinner, irregularly shaped forms while retaining appropriate strength.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is pre-determined by the formulation used in its manufacture.
- Cast stone products do not require any specific maintenance during their estimated lifespan of more than 30 years.
- Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.
